# Writing the Code

```
#include <Servo.h>
#include <LiquidCrystal.h>
#include <Keypad.h>

Servo myservo; //servo object creation

const int rs = 12, en = 14, d4 = 5, d5 = 4, d6 = 3, d7 = 2; //selecting LCD pins
LiquidCrystal lcd(rs, en, d4, d5, d6, d7); //lcd object creation

//setting keypad
const byte ROWS = 4; //four rows
const byte COLS = 4; //four columns
char keys[ROWS][COLS] = {
    {'7', '8', '9', '/'},
    {'4', '5', '6', 'x'}, //Mapping keypad keys
    {'1', '2', '3', '-'},
    {'C', '0', '=', '+'}
};

byte rowPins[ROWS] = {13, 10, 9, 8}; //connect to the row pinouts of the keypad
byte colPins[COLS] = {7, 6, 1, 0}; //connect to the column pinouts of the keypad
Keypad keypad = Keypad( makeKeymap(keys), rowPins, colPins, ROWS, COLS ); //keypad object creation

const char k[] = {'0', '0', '0', '0'}; //Passcode
char p[4]; //Empty array to store pressed button values
int button_counter=0; //variable to store number of pressed buttons

void setup() {

    lcd.begin(16, 2); //Setting up LCD
    lcd.setCursor(0, 0);
    lcd.print("Enter Passcode: ");
    lcd.setCursor(0, 1);

   myservo.attach(11); //selecting servo to pin 11
    myservo.write(0); // tell servo to go to position 0 deg
}
```

```
void loop() {
    bool wrong; //boolean to check if passcode is correct
    char key = keypad.getKey();
    delay(5);
    if (key) {

        if (key == 'C') {
            button_counter = 0;
            lcd.setCursor(0, 1);
            lcd.print("          ");
            lcd.setCursor(0, 1);
            myservo.write(0);
        }
        else {
            lcd.print('*');
            p[button_counter] = key;
            button_counter++;
        }
    }

    if (button_counter == 4) {
        wrong = false;
        for (int i = 0; i < 4; i++)
            if (p[i] != k[i])
                wrong = true;
        lcd.setCursor(0, 1);
        lcd.print("          ");
        lcd.setCursor(0, 1);
        if (wrong) {
            lcd.print("Invalid Passcode");
        }
        else {
            lcd.print("Access Granted");
            myservo.write(90); // tell servo to go to position 90 deg
        }
        button_counter = 0;
        delay(2000);
        lcd.setCursor(0, 1);
        lcd.print("          ");
        lcd.setCursor(0, 1);
        myservo.write(0);
    }
}
```
